wet/dry
pump

PORTABLE SHOWER

Rental Program

The person to be bathed can be rolled into the shower stall in a **standard wheelchair**. Once inside the shower stall, a front support bar is lowered so that the fourth side of the shower pan can be attached for wastewater collection.

A front shower curtain may be brought around for the person who is able to do their own bathing, or may be left open for **easier caregiver access** to assist with the bathing.

The source of water for the shower unit is any **standard sink faucet**. And, there is a **pump** which pulls the wastewater from the drain pan. There is a hose attached to the pump unit which returns the **wastewater to the sink drain** for disposal.

\$50.00 per week*

*One time delivery, set up and instruction fee of \$250.00.
Price will include rental of a rehab shower chair if necessary.
